

Suden about her Erasmus experience at Trnava University

First of all, Trnava is a calm and peaceful town to live in, and it is really affordable for a student. You can go anywhere by walking since it is a small town. There are many beautiful churches, all worth seeing.

The university is very nice, and the professors are always pleasant and understanding to students. Since I usually have classes with only a few students, they are very effective. It was always easy to communicate with professors. They helped me with everything and did more than only teach me. Because of the comfortable environment they create, I never feel anxious about anything, and I can always talk about anything with them. Professors and the coordinators make my experience so easy here that I am honestly grateful to them.

At first, it was a bit difficult to communicate with the people in Trnava, but after some weeks, I learned some elementary words, and that helped a lot. Even just greeting people in their mother tongue breaks the ice and makes it easier to get along. People may look a bit cold at first, but they are most welcoming and friendly here after you speak to them. They always try their best to help you even though sometimes they can not understand the language.

I met many lovely new people from various countries and learned about new cultures.

I am glad that I chose Trnava for my Erasmus experience.
